1. Claims 1-16 are presented for examination.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, it is not clear what is meant by "the device composed of a programmable device which can reprogram a circuit configuration thereof," as to the relationship between the programmable device and the circuit configuration.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by
Trimberger, U.S. Patent No. 5,748,979.

Trimberger teaches the invention as claimed in claim 1 including a semiconductor integrated circuit comprising:

- (a) a CPU (20),
- (b) an auxiliary operational device (21) for the CPU, the device composed of a programmable device which can reprogram a circuit configuration thereof (col. 8, line 3),
- (c) first diagnosing means for receiving one or more instruction and diagnosing whether the one or more instruction is a reserved instruction that can be processed by the auxiliary operational device (col. 12, line 45),
- (d) a configuration controller for programming circuit configuration data for executing processing of the reserved instruction into the auxiliary operational device (col. 12, line 60), and

further teaches a sin claims 2-7,

- (e) diagnosing means for diagnosing whether a circuit exist and execute the reserved instruction (col. 13, line 10) – claim 2,
- (f) where no circuit for executing the processing of the reserved instruction exist, instructing the CPU to execute the processing using substitute instructions when the reserved instruction can not be executed (col. 15, line 35) – claims 3-6,
- (g) configuration controller programming configuration data into the auxiliary operation device when no circuit for executing the processing of the reserved instruction exist (col. 12, line 60) – claim 7.
